KeyMacro Software helps users to record the most complex macros on their keyboard to use any functions or tasks that you want. KeyMacro Software helps users to record the most complex macros on their keyboard to use any functions or tasks that you want. By recording macros for different functions, users can assign them to any button or combination of buttons on the keyboard. For example, users can quickly and easily create a macro which turns a button on the keyboard to record any sound effect or makes any button perform a task. Users can assign macros to any of their keys to execute different actions with one keyboard click. Macro recording and execution has never been easier. KeyMacro is a professional software solution that can record any combination of keyboard keys. When macro recording is turned on, all the keys which have been assigned to perform a task will appear on the screen. Then you can record the desired combinations of keys by simply selecting them in the order they appear on the screen. Keyboard macros allow you to add a unique function to your keyboard and perform any task with a single click. KeyMacro helps users to assign macros to any keyboard key, perform some other function or task. KeyMacro gives you powerful tools to take control of your keyboard. Create macros for any task and assign them to any key, function or combination of keys and quickly and easily execute any task from one of the keys you've assigned. KeyMacro is a professional software solution that can record any combination of keyboard keys. Macro recording is a simple operation. You just need to select the keys that you want to perform a task from the list and assign a name for the macro. Then press the macro record button. Macro recording is a simple operation. You just need to select the keys that you want to perform a task from the list and assign a name for the macro. Then press the macro record button. Macro recording and execution has never been easier. KeyMacro is an advanced software solution that allows you to record, edit and execute any macro from any keyboard key. Record any combination of keyboard keys to execute a task and then assign a name to the macro to create a perfect shortcut. - Allows the user to select individual applications and inspect the proxies that each application is using. - Enable or disable proxies to speed up or slow down downloads and transfers. - Store the proxies used by an individual application. Stare is now open-source! Stare is the default application monitor for Stare Proxy checker, which allows you to see what applications are using proxies, and offers an easy way to set them up for use with your favorite applications. To use the app, follow these steps: 1. Open Stare Proxy checker from your system's app directory. 2. Click the gear icon in the top right-hand corner. 3. Select **Settings**. 4. Click **Save** in the **General** section. 5. Select the **Stare Proxy checker** entry in the **Actions** section. 6. To see how the proxy settings affect your internet connection, click the **Connect** button to test a new proxy. 7. When the test is done, click the gear icon again. 8. Select **Exit** to leave the app. You can now save your proxies as you normally would by clicking on the **Save** button on the **General** tab. You can use this app like any other proxy checker, you just need to know which proxy to use! If you want to learn how to use proxies, please visit You can request support through the GitHub site: You can find the source code on GitHub: The app is also available in the Google Play Store and the iOS App Store. ![Stare Proxy Checker Screen Shot]({assets/images/stare.png?raw=true}) [Logo]({assets/images/stare.png?raw=true}) © Copyright 2019 lstare.com.
